

# Eurotech at EMO SHOW,

★ HALL 17, STAND B54 ★

EMO is the leading global metalworking trade show and will take place September 16-21. Exhibitors from around the world will be spotlighting their solutions for the challenges of an internationally focused industry in the 21<sup>st</sup> century. If you are going to EMO, please contact us for FREE tickets to the show! (*holding on a first come, first serve basis*). At EMO Eurotech will be exhibiting the following technology:

**1 THE RAPIDO** - world's fastest 10 axis 1.42" bar machine. 3- tools in the cut simultaneously with powerful 15 hp on both main and sub spindles, delivers 50% faster cycle times. "Triplo" sub spindle and software delivers 3 tools in the cut simultaneously. A rigid fixed head stock design, (2) 12 station live Turrets, 1.97" of Y-Axis Stroke (both turrets), (2) 7000 rpm C-Axis Spindles, Programmable Super Shift Sub-spindle, Programmable Parts Catcher, Parts Conveyor System, 1.42" bar capacity, Great Ergonomics, Compact footprint: 149" x 55".

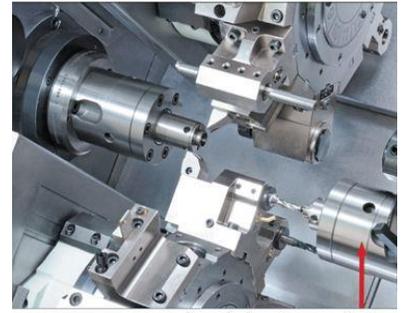

**2 THE TROFEO** - 11 axis bar machine with clear shift sub, five sizes up to 3.15 bar capacity. *Eurotech's Trofeo series offers a superior design that delivers extremely efficient and fast production of complex components*, using live tools, C-axis and Y-axis. This high precision turn/mill center has up to 11-axes with dual turret and dual spindle. The Trofeo series is a cut above its competition with advanced technology: 192 cutting tools for machining complex, precise parts and up to 48 live tools for milling operations.

**3 THE MULTIPLA** triple Y axis, five sizes up to 3.15 bar capacity. This all new Multipla line of three turret machines leverages the technology introduced several years ago into Eurotech's immensely popular Trofeo line of two turret machines. The result is the fastest three turret machine with the highest ROI available today.

**4 SMART TURN** 27 hp B axis ATC, 5 second chip to chip time, 40 hp main spindle and 35 hp sub spindle, 4"bar capacity, 15" chucks. The Multi-Tasking Eurotech SmartTurn that Turns/Mills ALL 6 Sides in One Set-Up. High rigidity and accuracy with solid boxway construction and Heidenhein scales on every axis. Fast and accurate machining complex parts from bar or chuck with Fanuc 31i-T series control.

**5 735SLY** -30hp, 6 axis, 2.75 bar machine. 25-35% faster cycle times than traditional multi-axis turning centers, providing unmatched ROI. Utilizing EGS tool system allows up to 96 tools - More Y-axis stroke than any machine in its class! Complete complex parts in one operation, load redundant tools for unattended machining, eliminate set-up time

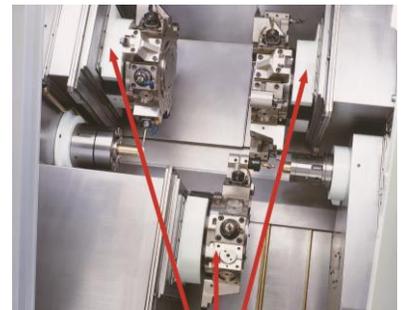

**6 NEW B1250**, 6 axis 40 hp, 49"center, 4"bar, 15" chucks, 16 station turret. The new B1250Y has a new, larger turret with an internal live tool motor, even more Y axis, and a larger machining field.

Super Impose Clearshift Sub-Spindle  
**No Faster Machine in the World!**  
**RAPIDO**

**Clear Shift Sub-spindle**  
**192 Cutting Tool Capability**  
**TROFEO**

**Three Y-Axis Turrets**  
**288 Cutting Tool Capability**  
**MULTIPLA**

**SMARTTURN**
